Would you like to: Submit plans online? Receive electronic versions of corrected plans? View real-time plan location status?

DPD is exploring the possibility of providing an electronic plan program that would allow you to do all of those things. But before we make decisions about future implementation, we need your input. The following survey will take just a few minutes of your time, but give us invaluable assistance in the decision-making process.

Enough talk, please **take the survey**. We appreciate it!
